

LPR with PL8 RDR Technology

OPS-COM's license plate recognition (LPR) system is an all-in-one solution for mobile or fixed mount locations. The OPS-COM LPR system can help you greatly decrease overhead costs for permitting and enforcement while improving your efficiency and management strategy.

Improve your Operations

The OPS-COM LPR system is a realistic, and viable option for parking operations of all sizes. The flexibility of the system gives you the opportunity to introduce the technology on your patrol team handhelds and then grow the program to include vehicle or stationary cameras. Our platform is designed to help you increase revenues and improve your operational efficiency through automation. Your patrol officers will benefit from more accurate real-time enforcement details, management will benefit from improved compliance and decreased labor and your users will benefit from a free flowing and equitable parking environment.

Key Features

- ✓ Automatic permit validation
- ✓ Auto chalking
- ✓ GPS Mapping
- ✓ Reduce labor costs
- ✓ Identify repeat offenders
- ✓ Captures reflective & non-reflective plates
- ✓ Capture images to support violations
- ✓ Real-time enforcement of all permit types
